# Integration Accelerator: Connecting Quickbase to Sage 300

Want to connect Quickbase to Sage 300 and avoid the risks and complexities of using an OBDC connection to read and write data into Sage 300? We've got you covered with our fully managed integration solution.

Calance Integration Accelerator

API

Create RPA-type bots that leverage the Sage 300 front-end and a dedicated end-user account to enter data into the system.

Calance Data Agent

Create cloud-based API endpoints that Quickbase apps can easily call.

Calance cloud-based integration environment

Customer on-premise environment

Our accelerator includes out-of-the-box integration flows that can read data from several tables within Sage 300 and that use RPA bots to create and update records using Sage 300 user input forms.

Pricing is based on your Quickbase edition and the number of integration flows used.
Please contact us at Connect@Calance.com for more information.

- The accelerator can be connected to a Sage 300 test environment, enabling you to configure and test within your Quickbase environment

- The accelerator platform has a built-in scheduler, so you can schedule when to run the integration

- The accelerator can be used to set up and configure API endpoints that Quickbase webhooks can call.

About Us

Calance is a technology services firm specializing in custom application development, system integration, data analytics, and business intelligence. As a Quickbase Partner focused on the Construction and Real Estate industries, we build integrated Quickbase solutions that connect with leading applications such as Sage 300. We empower customers to fill functionality gaps in their existing technology stack with Quickbase apps and our integration accelerators.
