Primavera Contract Management
JD Edwards EnterpriseOne
Financial Management Suite

“With Oracle’s Primavera Contract Management and Oracle’s JD Edwards EnterpriseOne Financial Management Suite, we have been able to integrate the accounting department with our contract management department and simplify our project management processes greatly—ultimately saving us time and money.” – Sandy Kayser, Contract Management Administrator, ValleyCrest Companies

ValleyCrest Companies Efficiently Manages More Than 1,000 Landscaping Projects with Easy-to-Use Solution

Founded in 1949, ValleyCrest Companies is the nation’s largest integrated landscape services company, with more than 100 locations nationwide. The company is commissioned by architects, developers, commercial real estate owners, public agencies, property managers, and luxury home builders to help create, build, or maintain some of the world’s extraordinary natural environments. ValleyCrest operates six business units and one subsidiary that deliver a full array of landscape services to a wide variety of commercial and residential customers across the globe.

Challenges

- Deploy a flexible solution to enable more than 125 project managers across the country to easily and effectively manage more than 1,000 active projects
- Ensure the system can scale to meet the company’s current and future needs

Solution

- Implemented Oracle’s Primavera Contract Management and integrated the solution with Oracle’s JD Edwards EnterpriseOne Financial Management Suite applications to provide a flexible, scalable organizational tool
- Met the needs of clients and subcontractors by integrating information and processes across the accounting and project management departments—ultimately simplifying the project management processes and saving ValleyCrest time and money
- Provided project managers easy access to comprehensive project overviews, enabling managers to drill down to the most minute detail of each project at the click of a button
- Enabled ValleyCrest to execute weekly and monthly audits quickly and accurately
- Eliminated the use of cumbersome spreadsheets, e-mails, and paper trails for project tracking by providing online access to all project-related items on a single screen
- Provided a robust solution with broad capabilities that ensured ValleyCrest’s ability to handle complex problems as well as the scalability to manage future company growth
